The mission of the Alliance for Disability in Health Care Education, an interdisciplinary organization, is to advance the availability of effective, appropriate and high quality health care for persons with disabilities by promoting the inclusion of disability-related theory, research, and clinical learning experiences in health care training.

OUR MISSION

The vision of the Alliance is to be a national leader and resource encouraging every medical, nursing, dental and other health care professional curriculum in the United States to integrate strategies to promote high quality health care for all people with disabilities across the lifespan.

OUR VISION

We Welcome Others Who Are Interested in Our Mission and Vision
